

The GREAT 1976 SWINE-FLU CAPER

WE KNOW THEY LIED – BUT WHY?

DID THE U.S. GOVERNMENT DELIBERATELY INJECT DISEASE TOXINS INTO THE BLOODSTREAM OF MILLIONS OF ELDERLY AND ILL CITIZENS?

HAS THIS BEEN AN ATTACK ON OUR FELLOW AMERICAN CITIZENS WITH INTENT TO MAIM AND MURDER?

A PLAN FOR "MASS MURDER?"

Dr. Archie Kalokerinos, a noted Australian physician with extensive experience with flu vaccines in Australia, told an audience of doctors in Los Angeles in September of 1976 that the U.S. Government's swine flu immunization program was "A plan for mass murder." Dr. Kalokerinos had written a book on his findings in Australia that flu vaccine was killing half the babies in his district!

THE STRANGE CASE OF DR. MORRIS

Dr. J. Anthony Morris, the government's most experienced flu researcher has said, "The swine flu is not contagious and is not a killer." He warned that the vaccine could induce greater diseases and, "We can predict that more and more tragedies related to the vaccine will come to light." He called the inoculation program a "potential virulogical nightmare."

When Dr. Morris released a public warning to the Washington, D.C. newspapers in July, 1976, government agents entered his laboratory, killed all animals he used in vaccine research, destroyed the vaccine research records of him and his staff and fired him!

The government then went ahead with the mass inoculation program, lying to the American people and saying there was "No evidence the vaccine was dangerous."

For a brief picture of how well they carried out their attack on the American people, read the pages that follow:

No Known Vaccine Available To Halt the Deadly Menace

World Is on Brink Of Killer Flu Epidemic!

By PAUL SMALL

A flu virus that normally affects only hogs may wipe out millions of people beginning next year. Scientists worldwide are rushing to find a vaccine to halt the possible outbreak. So far they are unsuccessful.

The virus is very much like the one that caused a worldwide flu epidemic in 1918. Twenty million people died, 600,000 of them in the U.S.

It is not the same virus that has caused more than 1,000 deaths in the U.S. during the past few months.

The new virus, discovered in February at Fort Dix, N.J., is called swine virus because it usually strikes only hogs.

U.S. public health authorities have alerted the World Health Organization to the danger. That group has ordered its laboratories all over the world to be on the lookout for the virus.

After a mild spread of the disease during the spring and summer months, the 1918 influenza hit humanity in the fall and winter like a giant, unseen scythe.

ONE BILLION people fell ill — one of every three persons in the world. Although government authorities worldwide played down the statistics, it was well known in medical circles that the epidemic ranked with the Black Plague of the Middle Ages as the worst disease disaster ever to hit mankind.

Death and suffering in the U.S. was immense, but compared to other nations, America got off rather easily.

In India, for instance, 12,500,000 people succumbed — one out of every 12. In the U.S., the death rate was one of 140.

In Europe, soldiers who had survived the murderous bloodbath of trench warfare for four years died by the thousands in military hospitals ill-equipped for the epidemic.

Most flu epidemics start early in winter and subside by spring. But killer epidemics are not so predictable. They can break out any time of year.

THE DEADLIEST epidemics hit much harder at young adults than normal outbreaks, which generally take their biggest toll among infants and old people. In 1918, the rate of flu among people aged 20 to 40 was twice as high as in other groups.

"If the swine flu should hit hard at this age group — which is the largest age group in the U.S. — the result could be more than 300,000 dead, and that's a conservative estimate," said a spokesman for the Federal Center for Disease Control in Atlanta, Ga.

Although there is no vaccine yet ready for swine flu, other medical advances since 1918 could cut the death toll.

Existing flu vaccines might work in isolated cases. Antibiotics might be of even more value.

ANTIBIOTICS neither prevent nor cure influenza, but they do help the body ward off secondary infections that result in a weaker physical condition allowing swine flu to strike harder.

"It is a dangerous waiting game," said the health spokesman. "You never can be sure about influenza. New viral strains are discovered all the time."

"We can only hope that swine flu does not take hold. If it does, then we must hope that medical science can quickly find a way to combat it."

World-wide alert for killer flu virus

THE BIG LIE TECHNIQUE

A WORLD-WIDE alert is on for a deadly strain of swine influenza, one which by next fall could threaten nearly every person in the U.S.

The virus last appeared in World War I when it spread through the trenches of France, and eventually killed 20 million people.

And medical experts fear it could sweep the country because the virus, or one very similar to it, has reappeared in hogs. And they fear it could sweep the country because the virus, or one very similar to it, has reappeared in hogs.

By CHRISTINA WINK

A flu virus that normally affects only hogs may wipe out millions of people beginning next year.

Evening Outlook 9-27-76
Dear Ann Landers:
THE BIG LIE TECHNIQUE

Facts On Swine Flu Shots Told

Dear Ann Landers: Please tell me (and millions of others) what this swine flu thing is all about. I need some no-nonsense answers to the following questions:

Why is the U.S. government spending \$135 million on a project when there is no evidence that there will be a swine flu epidemic?

When will the shots be available to the public?

Is there a chance that a person can get swine flu from the shot?

Who should take the shot? Who should NOT take it?

Is the shot safe for pregnant women?

How effective will the shot be?

What are the possible side effects?

Where will the swine flu shots be given?

How much will they cost?

Are YOU going to have a swine flu shot?

Thanks for your help. It's wonderful to have somebody to turn to for reliable information. — We Appreciate You In New York

Dear N.Y.: The U.S. government is spending \$135 million on the swine flu project because it believes preventive medicine. There may be no epidemic but it one should occur it could be devastating. In 1957-58, over 70,000 people in the U.S. died of the Asian flu. In 1968-69 the Hong Kong flu claimed 30,000 lives.

The swine flu shots will be available by Oct. 1. Assistant HEW Secretary Dr. Theodore Cooper estimates that the shots should protect about 85 per cent of those who take them. (The other 15 per cent should get milder cases than if they had no shot at all.)

There is NO change that a person will get the flu from the shot because the vaccine is made of a killed virus. The only significant side effects MAY be a sore arm and a fever. (The government ran an experiment on 6,000 volunteers. Out of those who received the swine vaccine, 1.9 per cent developed a fever that lasted about 24 hours or less.)

Should children get the shot? The researchers are still working on dosages for children under 18. However, those children who are inclined to get fevers should NOT get the shot.

It is strongly recommended that adults over 18 get the regular swine flu shots (200 units of A-New Jersey/76). For the high-risk population (those over 60, those who have chronic heart disease, respiratory problems, diabetes — or cancer patients who are in treatment), a combination of the swine flu vaccine and A-Victoria/75 is recommended.

There is no reason why a pregnant woman should not take the swine flu shot.

It has been emphasized that the shot should NOT be taken by individuals who are allergic to eggs (this includes pregnant women).

The shots may be obtained from your physician, who may charge for an office visit but NOT for the vaccine. (He gets it free.) After Oct. 1, phone your local health department and ask where and when the shots will be offered in your city. They will be free.

Am I taking the swine flu shot? You bet I am. I'll be one of the first in line the moment they are available.

Ann Landers, P.T. Box 1400, Elgin, Ill. 60120.

THE HUNT for a vaccine has top priority. If an outbreak comes, it probably will strike late in 1976. There are only a few months left to find a vaccine that may save millions from agonizing death.

Drug manufacturers already were at work on two types of flu vaccine when word came from the government about the swine virus. The vaccines were effective against the Hong Kong-type flu, but not the new strain.

The sudden appearance of the swine virus has caused a drastic switching of priorities. Health officials now must decide whether to pour all available money and research into finding a cure and preventive for the swine virus-caused flu.

The wrong guess can mean death for millions. And there are only a few short weeks left to decide, because it takes many months to make enough vaccine to ward off an epidemic.

IF THE swine virus is as deadly as some scientists believe it to be, it already may be too late to prevent an epidemic — even if a vaccine is found tomorrow.

The 1918 epidemic struck just as World War I was coming to a close. Many victims in Europe died because their bodies already were weakened by the deprivations of war.

Already, historians are noting the beginning of parallels between the 1918 epidemic and the current situation.

In 1918, the killer of the disease was preceded by a milder epidemic such as the U.S. is experiencing now.

THE NATIONAL INSIDER April 11, 1976

THE ABOVE IS ONLY A TINY SAMPLE

FOR OVER SIX MONTHS ALL OF AMERICA WAS DELUGED WITH DAILY NEWSPAPER ARTICLES, TELEVISION NEWS, RADIO SPOTS, FEATURE ARTICLES IN MAGAZINES, ETC., IN A PROPAGANDA EFFORT UNPARALLELED OUTSIDE OF RED COMMUNIST COUNTRIES. THEIR LIES WERE SO FRIGHTENING THAT MILLIONS LINED UP THE FIRST WEEK TO GET THE FLU SHOTS. EVEN WHEN PEOPLE BEGAN TO DIE, THE SCARE PROPAGANDA STILL PROVED SO POWERFUL THAT THIRTY MILLION AMERICANS GOT SHOTS AFTER THEY KNEW SOME DIED FROM THE VACCINE.

AFTER THE PROGRAM WAS UNDER WAY, THEY SCARED THEM INTO THINKING THERE MIGHT NOT BE ENOUGH VACCINE TO GO AROUND. FRIGHTENED PEOPLE LINED UP BY THE MILLIONS!! BELOW ARE JUST TWO EXAMPLES OF THE "SCARCITY" PROPAGANDA USED ALL OVER THE U.S.

Swine Flu Immunizations Begin

Vaccine's Availability Will Be Limited at First

BY HARRY NELSON
Times Medical Writer

The long-delayed swine flu immunization program finally got under way Friday—but only for a limited number of persons.

Dr. Sheridan Weinstein, the top Public Health Service physician in the Pacific area, and a group of high-risk patients at the Wadsworth Veterans Administration Hospital in Los Angeles were the first persons in the West to get the

own medicine first" to express his conviction that the vaccine is safe.

In line behind him were about 10 hospital patients, all of whom received their vaccination with a "jet gun" that sprays the vaccine under high pressure into the arm tissue without use of a needle.

There was general agreement that the jet gun

Other clinics for senior citizens and high-risk persons will be held the same hours on Oct. 13 and Oct. 20 at the Long Beach Health Department, 2655 Pine St. Dates on which the general public can get the vaccine at clinics

Kids' flu shots in short supply

CHEYENNE, Wyo. (AP) — A state health official on Friday said only enough vaccine to inoculate less than 7,000 children under 18 years of age against swine flu will be allocated the state.

Dr. H.S. Parish, director of disease prevention with the State Division of Health and Medical Services, said the 13,600 doses of vaccine will inoculate about 7 per cent of the 123,000 children under 18

against swine flu.

Two doses of the monovalent vaccine are required to protect the children against the swine flu, Parish said, meaning only 6,800 children will be able to receive the shots.

The health official said the vaccine will be distributed to private physicians based on community needs. He said the doctors will dispense the vaccine as they see fit.

He said the U.S. Center for

Disease Control limited the vaccine earmarked for Wyoming to 13,600 doses because no additional vaccine is being manufactured.

Parish said another 4,000 doses of bivalent vaccine, which guards against both swine flu and A-Victoria influenza, also will be distributed among the state's physicians. He said 2,000 children plagued by chronic diseases each will get two doses of that vaccine.

The state health official also said the Center for Disease Control has advised that young men and women between the ages of 18 and 24 receive a second swine flu shot to provide maximum protection.

Parish said one clinic will be held in each of Wyoming's 23 counties to inoculate persons within that age group and persons who might have missed earlier clinics.

THEY LIED TO THE PEOPLE

The evidence that the "swine flu epidemic" was a total hoax, and that the vaccine itself not only is useless but actually infects people with other diseases, is so overwhelming at this point that we can arrive at no other conclusion than that THIS WAS A WELL-PLANNED ATTACK ON THE HEALTH AND LIVES OF MILLIONS OF AMERICANS.

We have files and files of statements by trustworthy people, but space is limited, so here are a few:

Dr. J. Anthony Morris, 25 years of experience testing long-range effects of vaccines for the U.S. Bureau of Biologics: "The people who initiated the program used a man-made virus to produce the vaccine. We don't know ANYTHING about it—yet they indiscriminately began pumping this POTENTIAL VIROLOGICAL NIGHTMARE into the arms of 40 million innocent Americans. We're already seeing examples of what tragic things can happen as a result. Even worse, we can predict that more and more tragedies linked to this vaccine are waiting in the wings." (Dr. Morris was fired by the H.E.W. in July of 1976 after he issued a public warning that the vaccine was unsafe!)

Dr. Ernest C. Herrmann, Jr., professor of microbiology at the University of Illinois: "We have a vaccine which NO

ONE CAN BACK UP AS SAFE." Dr. Herrmann, speaking of the U.S. officials in H.E.W.: "They've lied from the beginning because they said it's effective and they have no evidence of that. None of these people (in the tests) were ever infected by influenza virus--so they never proved effectiveness."

Dr. Hubert Ratner, a Chicago area health official for 25 years: "The vaccine isn't any good...The CDC knows it, and we know it."

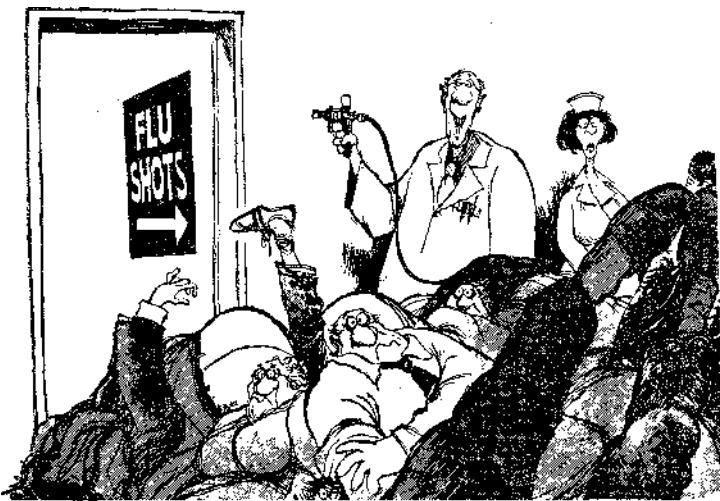

Dr. Cyril Wecht, chief medical examiner, Allegheny County, Pa., who performed autopsies on 3 victims: "The government is doing everything possible to make sure there are some cases labeled swine flu to justify their massive immunization program and the catastrophe associated with it...People should have been advised to ask their doctor if the shots were safe for them, especially if they'd had heart attacks or high blood pressure—but this was not done."

Dr. Charles Stuart-Harris, a virologist at the University of Sheffield, England, Medical School with long experience with flu vaccines: "The only persons it [the dose given in America] could even possibly protect are those who've already been exposed to swine flu and have built up partial immunity to the disease." In other words--the vaccine couldn't protect 99% of those who got it!

Dr. Arthur Chanin, veteran Los Angeles Pediatrician, "The American Academy of Pediatrics has never recommended immunizing children routinely. The cumulative effects of repeated flu injections is not known and may not be known for decades." After more warning of the danger of the flu vaccine, he further stated what many other

doctors have admitted, "As we in the medical practice know, the flu is NOT a killer." (Yet the U.S. officials continually released warnings that tens and perhaps hundreds of thousands could die from the swine flu--it was a deliberate lie!)

Dr. Archie Kalokerinos, Australian physician who wrote a book on how mass immunization programs in Australia killed one-half of the Aborigine babies: "Immunization can cause sudden death. They say the serum [the swine vaccine] has been tested. I say that is bunk and my beliefs are backed by companies making the drug who refuse to sell it unless the government insulates them against death and damage claims." Dr. Kalokerinos further stated that every undernourished or ill person would be especially susceptible to injury or death from the vaccine, and said inoculating individuals without a prior physical examination made the program "a plan for mass murder." (As readers know, it was exactly the old and the ill who were urged to get the shots by government and news media!)

Congressman Larry McDonald (D.-Ga.), who is a doctor: "Certain elements are trying to make this thing look like we're in imminent danger, when the truth is that no proof of swine flu being passed from person to person exists" (i.e., it is NOT contagious!).

THINK ON THIS! If the swine flu is not contagious, then the program was not needed for immunization--and if the program was not needed to save the people from swine flu--WHAT WAS THE PROGRAM FOR?

The answer, horrendous as it may sound, has to be that **THE WHOLE PROGRAM WAS PLANNED AND CARRIED OUT TO GET SOMETHING ELSE IN THE BODIES OF AS MANY MILLIONS OF AMERICANS AS POSSIBLE.** There is no other rational answer.

Death and paralysis of the victims proves "nerve damage," and nerve damage means **BRAIN DAMAGE--**and all communist governments use vaccinations to inject "mind-control" drugs into their slave populations. **IS IT POSSIBLE SOMETHING LIKE THAT HAS NOW BEEN DONE TO THE 40,000,000 AMERICANS?**

GOD ALMIGHTY WARNED US OF THE WICKED

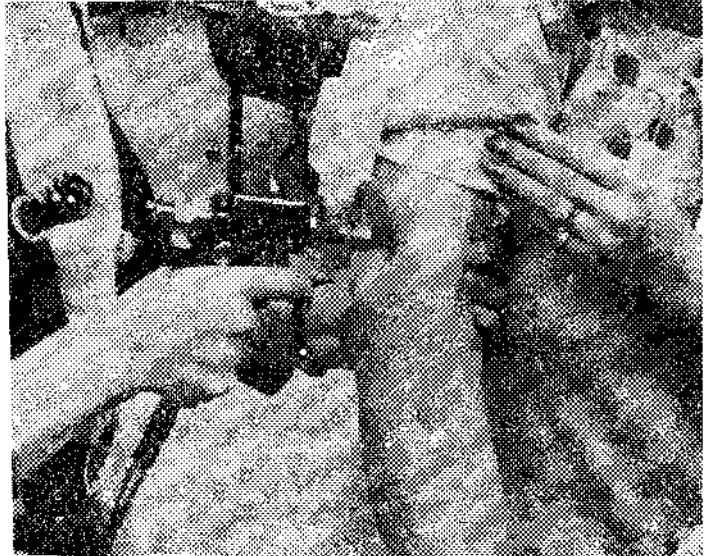

High officials in the executive branch of the U.S. Government have been betraying the American nation and its citizens to the Red communists for over 40 years. Many millions of Americans know that. Yet many of those same Americans just cannot believe the same officials could carry

out plans to injure and kill them in their own country.

But God's Word warns us that the wicked are so wicked they **CANNOT** be trusted in or with anything except to do evil!

Wise king Solomon wrote of the *wicked* that they *rejoice to do evil* [Proverbs 2:14], and in chapter 4 he wrote, *For they sleep not, except they have done mischief and their sleep is taken away, unless they cause some to fall* [vs. 16]. Men who are wicked enough to betray their own nation are wicked enough to suffer from insomnia unless they can figure out some way to hurt other people.

This is what we are dealing with here--men so devoid of conscience that they enjoy planning the deaths of other people.

DO CHRIST'S ENEMIES RULE OVER US?

God Almighty told His People in Lev. 16:17 that if they disobeyed His Laws, *they that hate you shall reign over you.* Jesus said in the *great tribulation* the antichrists would *afflict* and *kill* Christians. Is it possible the inoculation of disease is part of this fulfillment? The men and women who carried out this "hoax" are not Christians but are *antichrists* according to 1 John 2:18-23 and other Scriptures.

Seventy years ago there was exposed in Europe a document called "The Protocols." It set out a plan for the conquest of all nations by the Jews. One part of the plan was to bring calamities upon the nations, including "THE INOCULATION OF DISEASES." The government agencies and news sources that promoted the vaccination program with lies and panic are Jewish or Jewish-controlled--AMA, HEW, CDC, FDA, President's Cabinet, ABC, CBS, NBC, UPI, UPS, most daily newspapers, slick magazines, columnists (e.g., Ann Landers), and national news broadcasters. Many will recognize this was a planned attack on the non-Jewish population by the Jews. God warned our People in Lev. 26:17 that if we turned from His Word and His Laws, *they that hate you shall reign over you.* Are the Christian-haters ruling America?

May God's People, called by His Name (Christians), humble themselves, and pray, and seek His Face, and turn from their wicked ways, that He may hear from heaven, and forgive our sin, and heal our land, in Christ,

Pastor Emry
